Certaine

Certaine neceſſarie obſeruations, *touching the Rules of* Phiſick.

THE ſeaſon being verie hote, or extreme colde: (after the Rules of Phiſick) is not commended to miniſter eyther Potion, or Pill, for the cauſe of purging: nor ſafely to let bloud, except neceſsitie require the ſame.

Item, no part of mans body ought to be touched vvith the Chirurgicall inſtruments, or cauterie actuall or potenciall: vvhen the Sunne or Moone, or the Lorde of the Aſcendent, is in the ſame ſigne, that ruleth that part of mans body.

Alſo Gemini, Leo, the laſt halfe of Libra: and the firſt 12. degrees of Scorpio: vvith Taurus, Virgo, and Capricorne, are not good for the letting of bloud. Tvvo dayes before the chaunge of the Moone, and a day after, is yll to let bloud.

To theſe, gliſters, and gentle purgations, by the aduiſe of the Phiſition may be miniſtred at all tymes, vvithout daunger. As touching the letting of bloud, if the ſame be for the Peſtilence, the Phrenſie, the Plureſie, the Squincie, or for a continuall headach, proceeding of choler or bloud: or for any burning Ague, or extreeme paine of partes: a man maye not ſo carefully ſtay for a choſen day by the Almanack: for that ih the meane tyme the pacient perhaps may dye. For vvhich cauſe, let the ſkilfull Chirurgian ōpen a veine, vnleſſe he finde the pacient verie vveake or lyke to ſonnde, or that the Moone bē in the ſame ſigne that gouerneth that part of mans body.

Notvvithſtanding all theſe afore taught, I vvould vvishe that no man should venter to be let bloud of any vnskilfull Chirurgion, vnleſſe he haue the iudgement of the learned Phiſition.

¶ This yeare. 1571. ſhall be no Eclipſe at all, neyther of the Sunne, nor of the Moone, aboue our Horizon.

The

¶ The deſcription of the fower quarters of the yere, begimning the twelth of December in the yeare. 1570.

WInter beginneth the.12. day of December. 1570. at vvhat time the Sunne entreth into Capricorne, and endureth vntill the.11. of March, at vvhat tyme the Sunne entreth into Aries, this quarter for the moſt part is inclined to great vvinds and tempeſts vvith much variable vveather, vvith colde and moyſture, vvhich vvill be an occaſion of dyuers diſeaſes and infections of men and beaſtes, as theſe, The Hedache, the Palſie, the Cough, vvith paynes in the breaſt, ſtitches in the ſides, and diuers other diſeaſes: the helpe whereof, is amendment of lyfe and earneſt prayer, that God vvill turne thoſe euils from vs.

¶ Of the Spring.

THe Spring time beginneth the.11. day of March. 1571. and endureth vntill the.12. of Iune, at vvhat tyme the Sunne entreth into Cancer. This quarter I finde to be marueylous prodigious, and giuen to tempeſtuous vvindes vvythout raine, vvhich vvinde vvill be an occaſion of much hurt. There alſo ſhall be ſmall ſtore of raine and moiſture, and that vvhich falleth ſhall come out of ſeaſon, by reaſon of vvhich, there is lyke to be ſome ſcarcitie, both of corne, graſſe, and fruite, vvhereof both men and beaſts ſhall ſuffer great penurie. The common people ſhall ſuſtayne alſo much loſſe of goods, both by vvarres, robberies, and fire, vvith many peſtilent diſeaſes, vnleſſe God turne avvay this rodde from vs.

¶ Of

Of Summer.

SVmmer, beginneth the. 12. day of Iune, and continueth vntill the. 13. day of September, at vvhat time the Sunne entreth into Libra. This quarter for the more part is like to bee temperate, but yet somevvhat vvindie and drie, vvith thunder and lightning, and alteration of the ayre. Also many diseases are like to proceede of the Choler and vvhote bloud, as sore eyes, burning Agues, Apostumes, vvith Botches and Byles. Also in this quarter is like to happen manye controuersies, betvveene men of vvelth and auethorie, vvith losse of goodes, but notvvithstanding some men shall haue good succesſe, and profite, both by their seruaunts and cattell, and in this season peoples mindes vvill be vnconstant and fickle, and sometime affectionate to one thing, and sometimes to an other: all vvhich resteth in Gods hande to peruert.

Of Autumne.

AVtumne, or harueſt, beginneth the. 13. day of September, and continueth vntill the. 12. day of December, at vvhat time the Sunne entreth into Capricorne. This quarter the vveather is like to be verye vnconstant, vvith much drouth, and sometimes addicted to heate, and sometimes to colde, vvhich vvill be an occasion of engendring many straunge Feuers and other diseases, vvhich vvill cause the death of many children, and men of a middle age, many vvomen shall be brought a bed before their time. Also in this season manye perils are like to happen vpon those countries that are vnder Cancer, as trouble, sickneſse, oppreſsion, scarsitie of vittayles, vvarres, and shipvvrackes, vvith many such lyke calamities, vvhich are of vs most iustly deserued, but God of hys infinite goodneſse, I truſt, vvill tourne all thing to the best for his elect.
